Dear Mr. Celiksirt and Mr. Erkan:

Canadore College is located in North Bay, Ontario Canada, which is situated approximately 320 km north of Toronto Ontario. Canadore College is the only institution that offers the Surface Blaster Apprenticeship program that is recognized by the Ministry of Training, Colleges and Universities (Ontario).

The DelPat software program is used as an educational tool in the Surface Blaster Apprenticeship program. The Delpat program is primarily used to demonstrate the application of computers for the purpose of blast optimization as well as the determination of drill-blast costs. The DelPat program has been used very successfully in the Surface Blaster course. Students, with minimum experience in the use of computers, have been able to successfully run the program. The user-friendly software, with its menu system, enables the students to perform simulations in a quick and effective manner.

The DelPat software certainly has proved to be a valuable addition to the Surface Blaster Apprenticeship program.

Sincerely,

*Art Page*
